

Achieve Better Patient Outcomes With End-To-End Clinical Solutions

Partner with us for multilingual clinical services powered by our AI-first global content platform, Lionbridge Aurora AI™. We support all types and phases of clinical trials for medicinal drugs and medical devices. With our end-to-end Managed Services Provider (MSP) model, Lionbridge can centralize all your clinical language outcomes and drive efficiencies, cost-savings, and language accuracy across your audiences and R&D pipeline.

Benefits of Our Managed Services Model

Eliminate expensive CRO markup costs and gain spend visibility across all language outcomes

Innovate safely and effectively by partnering with our multidisciplinary expert teams across clinical research, language excellence, and integrated technology domains

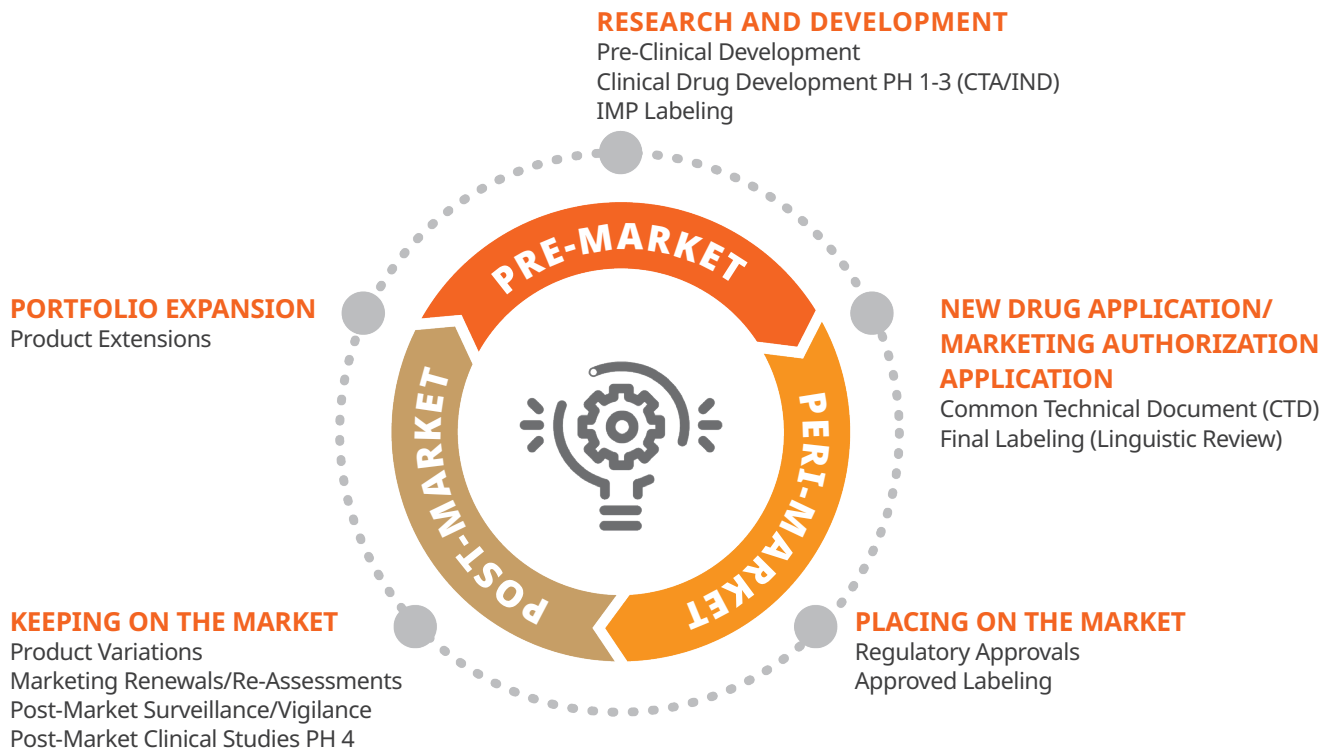

Maximize language efficiencies across your global clinical development programs and through global regulatory filing

Obtain language excellence across professional and plain language audiences

LIFE CYCLE LANGUAGE STRATEGY

○ Clinical Trial Translations Powered by Lionbridge Aurora AI™

Ensure quality, fast execution, data integrity, and the well-being of trial volunteers through all clinical trial stages. Choose Lionbridge's expert-led, risk-based AI language strategy across your clinical development programs. We deliver:

- Speed to clinical trial authorization, initiation, execution, and reporting
- Incremental cost-savings exceeding 50% with customized AI, Translation Memories, and glossaries
- Industry, product, and therapeutic-specific language accuracy focused on outcomes, intended purposes, and intended users

○ How Lionbridge Supports:

Clinical Trial Documentation

Accelerate the entire clinical trial process by ensuring accurate, timely communications with all stakeholders. Lionbridge has the linguistic, clinical, and process expertise to ensure on-time, accurate translations for every content type: informed consent forms, site activation materials, study protocols, or patient engagement materials. We'll help you:

- **Manage multiple languages** in one simple process
- **Maximize the re-use of previously translated content**, driving efficiencies and minimizing cost
- **Track the progress** of your project in our user-friendly portal at any time
- **Reach every audience**, in every language

Clinical Labeling

Eliminate execution barriers with our mature clinical labeling solution that supports any protocol design and complexity. Our specialized clinical labeling team spans more than 100+ countries and languages to address global label creation:

- **Accelerate global IMP label creation** (MELT) and validation turnaround times from months to weeks (or days)
- **Obtain regulatory and linguistic consistency** across markets, languages, and vendors with our compliant phrase libraries
- **Transfer validated labeling assets** from trial to trial and across the globe
- **Gain predictable global study start-up** and avoid rework downstream

Clinical Outcome Assessments

Harness the power of high-quality outcomes and AI efficiencies. Lionbridge's ISOQOL-recommended hybrid approach embeds AI where it delivers value — while preserving human oversight at every critical step:

- **AI drives efficiency and consistency** in concept definition and structuring, comparative review, consistency checks, eCOA migration, and QA processes
- **Human expertise controls** final translation decisions, reconciliation and linguistic validation, cognitive debriefing, and patient-facing activities

Get Started

Benefit from a partner with the expertise and quality assurance you need. Contact us today to speak with an expert about how we can deliver the most efficient, effective, and high-quality multilingual solutions.
