

Improved and Accelerated Life Sciences Content Outcomes

Expert and AI-powered multilingual life sciences language and content creation solutions.

Lionbridge has deep expertise in:

- Regulated life sciences content, regulatory translations, and technology
- Full medicinal drug and medical device life cycle

How Lionbridge is Designed to be Different:

Regulated translations and linguistic validation call for experienced linguists with industry expertise. Our AI-enhanced language services support the full life cycle of your drugs and medical devices with the accuracy you require to bring your messages and products to the world — safely, efficiently, and fully aligned with regulatory compliance standards.

Connect to your global audiences in 350+ languages.

Achieve language outcomes that advance your science globally and engage patients worldwide. We support every stage, from research and development to regulatory registration and post-market maintenance.

Enhance your scientific and patient outcomes globally through Lionbridge Aurora AI™. Our AI-first global content platform harnesses the latest technological advancements to increase multilingual content generation and expand your global audience. What makes Aurora AI different is composable orchestration, which provides us with the agility to adjust any process quickly.
