5 **NO HUMAN POST-EDIT**

POST-EDITING

The linguist ensures the translation is accurate, stylistically polished, and fully aligned with the target audience and brand.

LIGHT POST-EDITING

A lighter-touch check designed to catch clear errors or inconsistencies without aiming for full stylistic refinement.

TARGETED CONTENT

At the end of AI translation — the Aurora AI platform applies a validation phase using human reasoning to ensure that quality thresholds are met and to determine whether a segment requires further human post-editing. **All levels of post-editing can be performed on all or targeted content identified by APE only.**
